EXPERIMENT 5: REPORTS, DASHBOARDS, AND UI BUILDER

Aim

To develop reports, dashboards, and user interfaces in Zoho Creator for the Automated Corporate Talent Acquisition and Interview Tracking System by creating different report types and configuring visualizations for effective recruitment data analysis and presentation.

Procedure

1. Log in to Zoho Creator and open the existing Automated Corporate Talent Acquisition and Interview Tracking System application.

2. Open the Reports section and create a List View named All_Candidates_List to display candidate names, contact details, applied positions, and application statuses.

3. Create a Spreadsheet View named Candidate_Applications_Spreadsheet to display candidate application records in a grid and manage fields such as qualifications, experience, interview dates, and recruitment status, if available.

4. Create a Kanban View named Recruitment_Status_Kanban to organize candidates according to their recruitment or application status.

4. Create a Calendar View named Interview_Schedule_Calendar to display scheduled interviews using the Interview Date field.

6. Create a Map View named Candidate_Location_Map to visualize candidate locations using the Address or Location field, if supported and relevant.

7. Create a Timeline View named Recruitment_Activity_Timeline to display application and interview activities according to their submission dates or scheduled dates.

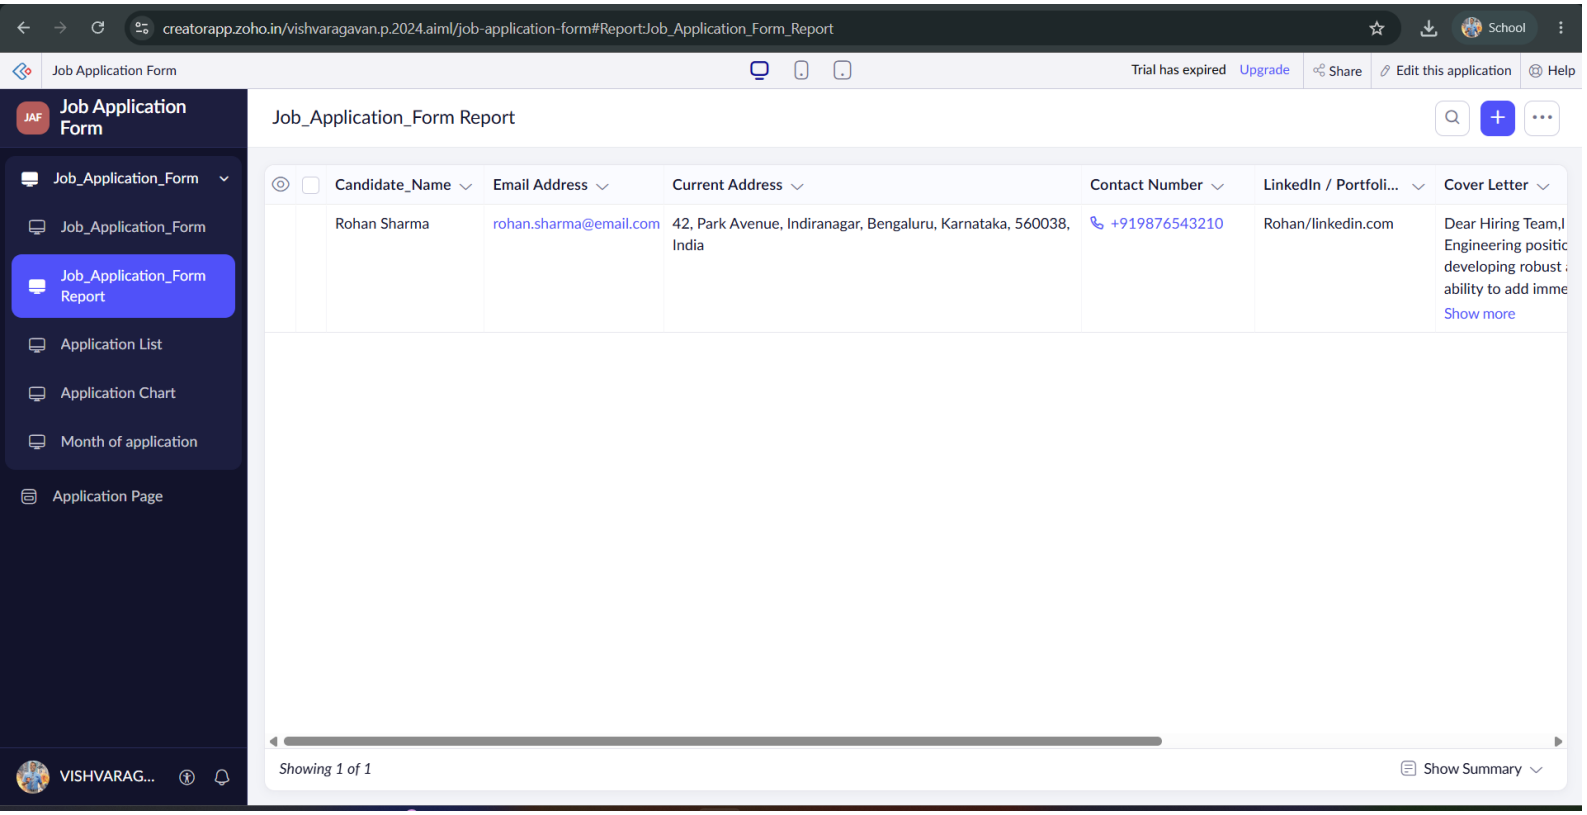

8. Create a Pivot Table named Candidates_By_Position_Status_Pivot to analyze candidate counts by Job Position and Application Status.

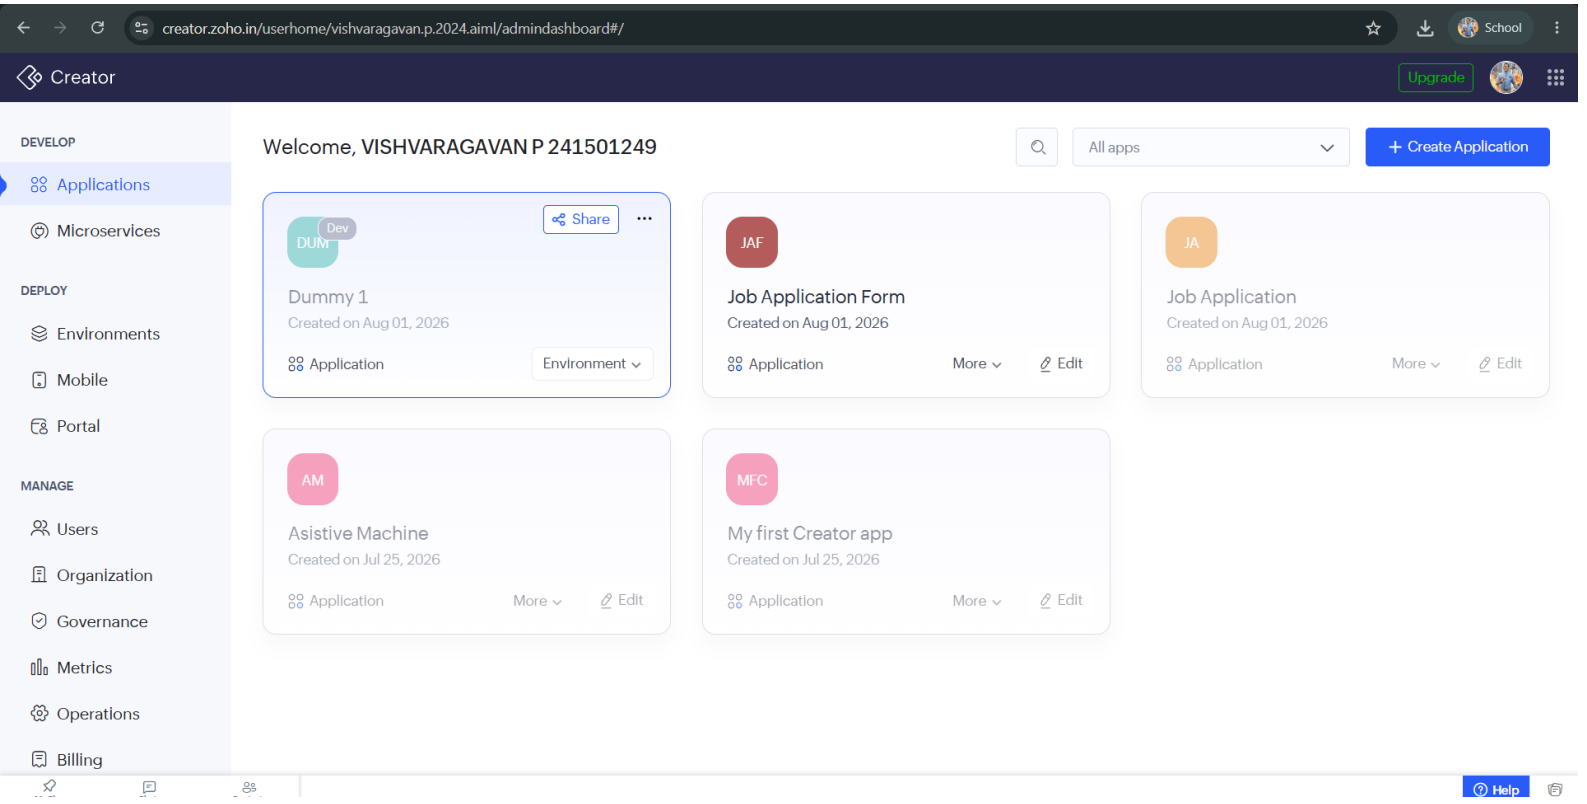

9. Create a Chart View named Recruitment_Status_Chart using a bar chart to compare the number of candidates across application or recruitment statuses.

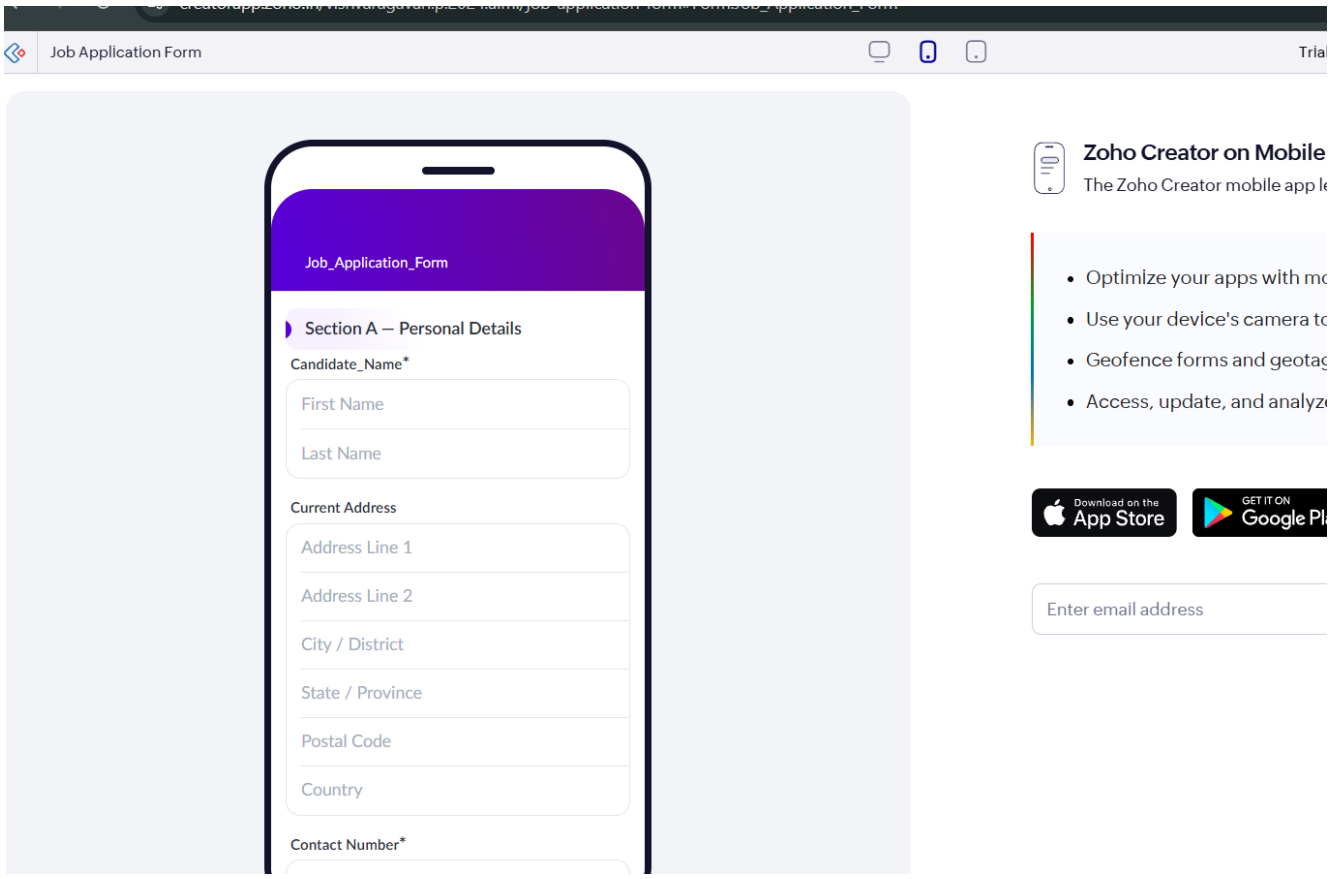

10. Create a Summary View named Position_Wise_Summary to summarize candidate counts by applied job position or recruiter, if these fields are available.

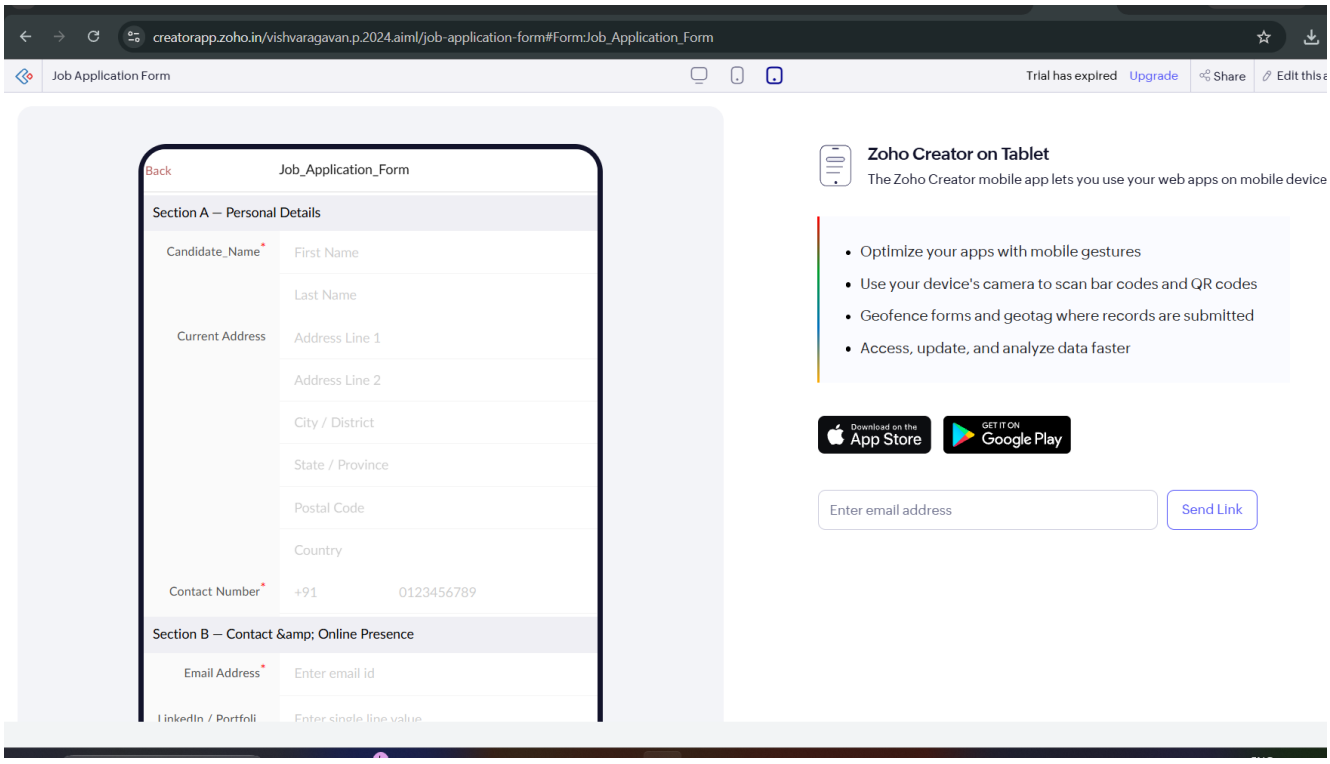

11. Configure the display fields, sorting, grouping, and other settings for each report based on the available candidate, job, and interview fields in the forms.

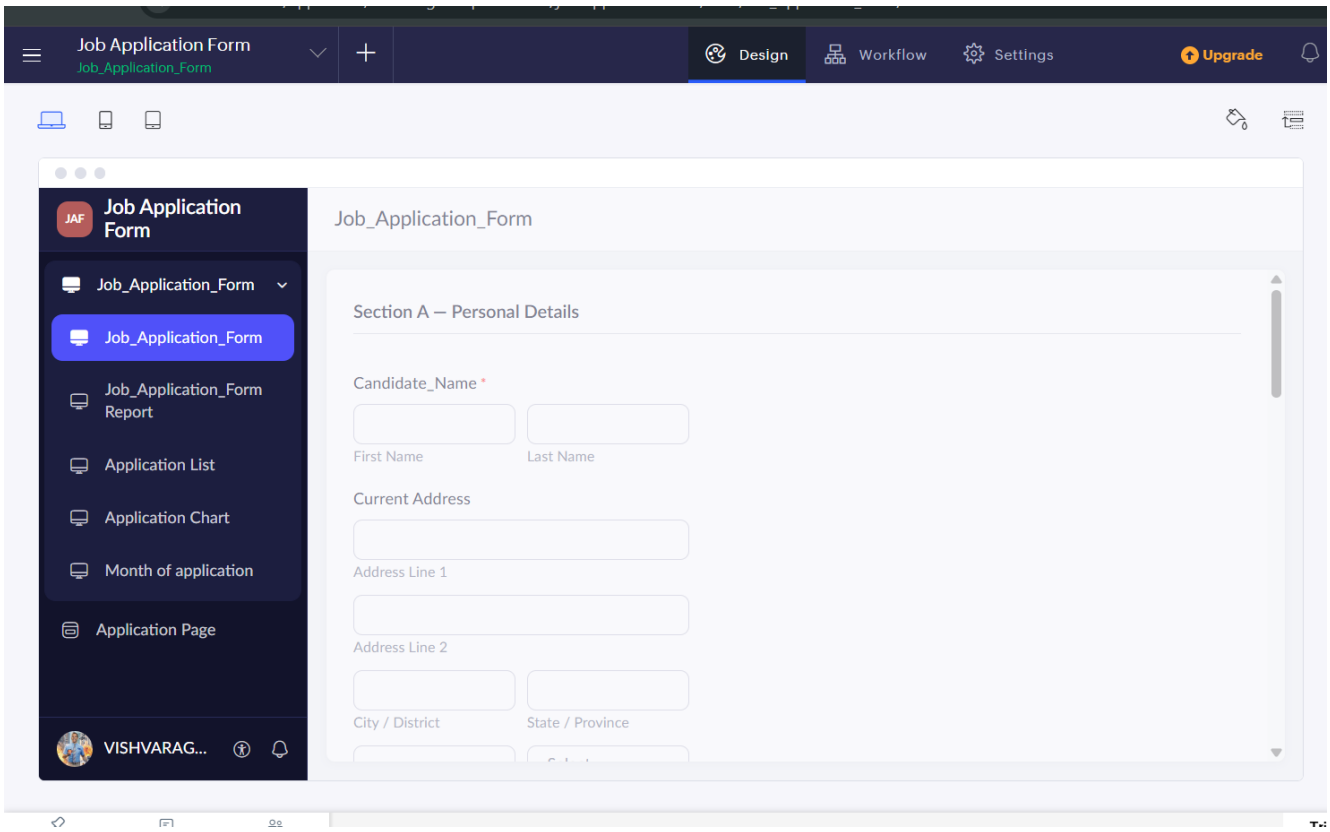

12. Test the reports and dashboard using sample candidate, job application, and interview records, and verify that the data is displayed correctly.

RESULT:

Thus, different types of reports and visualizations were configured in Zoho Creator for the Automated Corporate Talent Acquisition and Interview Tracking System. These reports and dashboards help organize, analyze, and present candidate, job application, and interview information effectively for recruiters and hiring management.
